BREEDING CONFIDENCE

AMERICAN CRYSTAL REGION
2025 PRODUCT GUIDE

**NEXT-GEN
BREEDING FOR
NEXT-GEN
CONFIDENCE**

WE'VE GOT BREEDING CONFIDENCE DOWN TO A SCIENCE

At Betaseed, we're using advances in science to optimize the potential of every seed you plant. Our state-of-the-art breeding and testing process takes up to ten years. It's the only way to ensure the hybrid your Betaseed rep recommends has the best traits to manage disease and drive yields on your farm.

A DECADE OF RESEARCH AND DEVELOPMENT

YEARS 1-3 NEW LINE CREATION

YEARS 4-6 EARLY-GENERATION TRIALS

HAND CROSS

Development of a parent with genetics for increased productivity.

SELFINGS

The first step in seed multiplication.

PARTITIONS

Production of test hybrids for early-generation decisions.

EXPERIMENTAL HYBRIDS

Production of potential candidates for official variety trials (OVT).

THE RIGHT TREATMENTS

Our sugarbeet seeds are specially treated to give them an extra layer of protection from seedling pests and diseases. In addition, the right treatment provides a wider window of opportunity for pesticide applications. Betaseed offers you unique solutions tailored specifically for your region.

AMERICAN CRYSTAL REGION SEED TREATMENTS

**BetaShield[®]
COMPLETE**

Allegiance, Thiram,
Tachigaren 35g,
Poncho Beta, Kabina

Allegiance, Thiram,
Tachigaren 20g,
Kabina

YEAR 7 HYBRID PRODUCTION

YEARS 8-10 OVT TESTING

YEAR 10

PRE-BASIC

A genetically pure increase of selected parent/breeder seed.

BASIC SEED

Seed planted to grow parents for commercial varieties.

COMMERCIAL SEED

Seed grown, processed and OVT tested to meet customer demand.

SEED DELIVERY

You plant the right variety for your farm with confidence.

VARIETIES FOR 2025

The hybrids in this guide were developed with research-driven solutions combined with our local breeding expertise to produce the industry's highest performing, most consistent seeds. Each variety was painstakingly researched, bred and tested over multiple seasons to make sure it has what it takes to thrive on your farm.

8226	CR+		
	Low	Moderate	High
RHIZOMANIA	Low	Moderate	High
APHANOMYCES	Low	Moderate	High
FUSARIUM	Low	Moderate	High
ROOT APHID	Low	Moderate	High
CERCOSPORA	Low	Moderate	High
RHIZOCTONIA	Low	Moderate	High
SUGAR	Low	Moderate	High
TONS	Low	Moderate	High

Exceptional sugar and revenue potential.
High Aphanomyces.

*Varieties noted as new are pending approval, please check with your sugar cooperative for updated information.

8018 CR+

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

High tonnage beet with high sugar revenue potential.

A well-balanced disease type variety with high tolerance to Aphanomyces, Fusarium and Rhizoctonia.

8359 CR+ **NEW**

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

High yielding beet with good Rev/A. Excellent Aph protection.

8270 CR+

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

High sugar, tonnage and revenue potential. Well-balanced disease variety.

8034 CR+

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

Very high tonnage potential. Exceptional Fusarium combined with high Aphanomyces tolerance.

8156 CR+

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

Well-balanced hybrid with both sugar and yield potential.

Very well-rounded disease tolerance against Aphanomyces and Rhizoctonia combined with excellent Fusarium.

8365 **NEW**

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

Very high sugar variety. Well balanced protection against Aph and Rhc.

8927

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

Very high sugar variety with high revenue potential. Excellent variety position for Pre-Pile.

8328 **NEW**

	Low	Moderate	High
RHIZOMANIA	High	Moderate	Low
APHANOMYCES	High	Moderate	Low
FUSARIUM	High	Moderate	Low
ROOT APHID	High	Moderate	Low
CERCOSPORA	High	Moderate	Low
RHIZOCTONIA	High	Moderate	Low
SUGAR	High	Moderate	Low
TONS	High	Moderate	Low

Excellent Rev/A. High sugar. Excellent Aph protection.

REGIONAL BREEDERS

Thomas Keeps

Tiffany McKay-Williams

Margaret Rekoske

Pat O'Boyle

1 IMPERIAL VALLEY

Joe Freiburger
Regional Sales Manager

Independent Sales Agents
Matt Mills

Our breeders are focused on developing high performing varieties with good bolting tolerance.

2 AMALGAMATED

Joe Freiburger
Regional Sales Manager

Dave Bergh
Sales Representative

Independent Sales Agents
Jim Chapman
Vaughn Casdorff
Bo Isham

Aaron Bates
Wendell Robinson

Our breeders are dedicated to developing a portfolio of high performing varieties with very high sugar content.

3 LANTIC, INC.

8 MINN-DAK FARMERS COOP

9 SOUTHERN MN BEET SUGAR COOP

Cody Lehman
Key Account Manager

Our breeders are developing varieties that provide balanced disease tolerance and top performance.

4 WESTERN SUGAR NORTH

5 WYOMING SUGAR

Steve Skaalure
Sales Manager

Independent Sales Agents

Dan Madden
Mike Hjelvik
Dale Icopini

Scott Reisig
Peter Kukowski

Our breeders are focused on high performing nematode tolerant varieties along with new curly top parental lines that possess a balanced tolerance to diseases and pests.

6 WESTERN SUGAR SOUTH

Ryan Reuter
Sales Manager

Independent Sales Agents

Kent Mauser
David Blach
Ronald Blach
Mike Burdette
Aaron Worley

Ed Croissant
Dan Melcher
Mark Spaur
Brian Specht
Carl Lux

Our breeders are committed to providing disease tolerant varieties specific to the region.
